

NMS Sourcing – a professional one-stop partner and market representative

Value creation via a centralized sourcing function

- Market representative for users of biomass and other wood segments
- Experience-driven approach and market overview
- Strategic positioning and timeliness in procurement
- Quality and logistics optimization
- Integration of procurement and sustainability
- Due diligence and risk mitigation
- Documentation and traceability
- Resource optimization in energy production
- Confidence in security of supply and sustainability compliance

With NMS as representative or partner in the market, the user of biomass and other wood segments is ensured best practice within commercial procurement, appropriate due diligence and timely sustainability documentation as well as transparency in project related expenditure.
